## WINTER STORAGE PACKET

Please join us for storage and service this winter. This storage packet includes our 2017 to 2018 winter storage contract and decommissioning checklist.

Our boatyard operates at capacity so please reply as soon as possible to reserve your space. All contracts are subject to acceptance by our General Manager, Dave Johnson. Preference will be given to those customers requesting work. Inside storage is limited, therefore, all decommissioning, commissioning and service work is required to be performed by the yard on boats storing inside. Vessels under 25 ft. have a new flat rate winter rack storage fee which includes shrink-wrap.

*Slip and rack contracts will be mailed in November. As per our policy, slip preference/availability will be given to our storage customers.*

**In order to request a space please return the following:**

- **Signed contract with credit card authorization for timed payments (half with contract, balance after haul)**
- Completed decommissioning checklist
- Proof of insurance

*If you are considering a major project, such as a new Awlgrip paint job, a bow thruster installation, generator or engine replacement, we are happy to quote. Our service team is highly skilled and ready to take on most any project. Vessels in for major winter work may qualify for significant storage discounts, please contact Dave. All bottom preparation and painting will be done by Brewer's personnel unless specific permission is obtained by the yard. Outside labor will be limited to pre-approved insured contractors who provide unique services that we don't.*

Please give the office a call to answer any questions or to discuss your needs.

Thank you for your business.

Dave Johnson
